Fire Farm is a commercial entity serving the interior architecture and design community creating innovative lighting fixtures and sculptural works of art.

Started in a garage in Oakland, California in 1991, Fire Farm has worked with light since then under the direction of Adam Jackson Pollock. The works presented here exist because of the combined labor, care, and creativity of past and present individuals who have made up Fire Farm.

In 2001, Fire Farm relocated to downtown Elkader, Iowa, to continue manufacturing in the USA. Everything is made and globally distributed from Elkader.

Please explore additional work at [www.FireFarm.com](http://www.FireFarm.com). Contact us with your project needs; we look forward to creating with you.
