THE PEARL COLLECTION
ITEM 03081

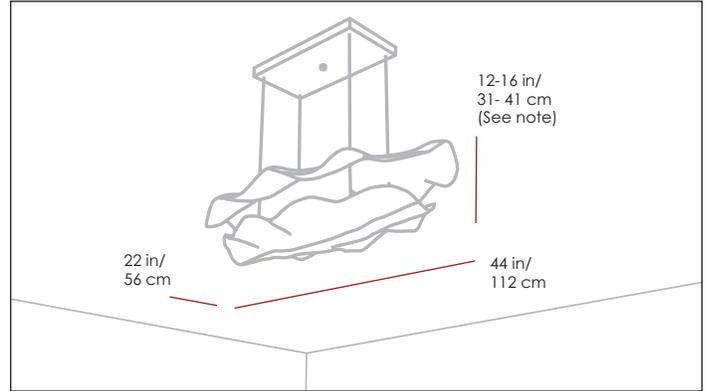

Light flows like liquid across the pearlescent surface engineered for this sculpture.

The upper undulating oyster shell reflects the light down in a soft and pleasantly diffused manner. As with natural pearls, each fixture is individually hand-formed and distinct in nature.

Your Pearl will be the focal point of any installation evoking conversation and creating a memory of your space.

Pearl is available in three sizes of pendant and one wall sconce, with white light or dichroic rainbow light (both included), to fit any project need.

Fire Farm is a lighting design company that offers unique and innovative custom work to clients worldwide since 1991. Its founder and director, Adam Jackson Pollock, leads a team based in Elkader, Iowa, who conceive of light as a creative medium not unlike clay or paint. This approach manifests itself in Fire Farm's use of non-traditional materials and techniques not found in typical lighting applications.

In its collaborative partnerships with interior designers and architects, Fire Farm creates sophisticated bespoke designs for hospitality, restaurant and residential clients which are unobtainable from off-the-shelf, mass-produced lighting manufacturers. The results are industry-defining ideas that are sexy, dynamic, playful and dramatic – lighting as both an illusory and emotional experience.
