

PROJECT 2459.001

RELATED PRODUCTS

PRODUCT DESCRIPTION

Originally designed for a movie theater, this fixture is composed of eight laser-cut filagree metal panels measuring 72" in diameter. The panels are mounted into a 25" diameter faux alabaster bowl.

The fluorescent bulbs are concealed by an inside white fabric diffuser 5 1/2" high. The metal panels were painted a rich green to glow dramatically against a black ceiling.

Consider another metal pattern of your own design to make this fixture unique to your needs.
