Fire Farm is a lighting design company that offers unique and innovative custom work to clients worldwide since 1991. Its founder and director, Adam Jackson Pollock, leads a team based in Elkader, Iowa, who conceive of light as a creative medium not unlike clay or paint. This approach manifests itself in Fire Farm's use of non-traditional materials and techniques not found in typical lighting applications.

In its collaborative partnerships with interior designers and architects, Fire Farm creates sophisticated bespoke designs for hospitality, restaurant and residential clients which are unobtainable from off-the-shelf, mass-produced lighting manufacturers. The results are industry-defining ideas that are sexy, dynamic, playful and dramatic – lighting as both an illusory and emotional experience.
